THE ARCWRITER'S GUIDE

A Screenplay

by

The ArcWriter Team

FADE IN:

INT. WRITER'S ROOM - NIGHT

A lone WRITER, ANNA (30s, determined), stares at a blank screen. Empty coffee cups litter the desk. The glow of her monitor illuminates a dog-eared copy of "Save the Cat."

ANNA (V.O.)
They say writing a screenplay is
like building a house. But
sometimes, you just need a damn
blueprint.

A notification flickers on her screen: ARCWRITER STUDIO.

CUT TO:

INT. THE LANDING PAGE - DAY

Anna enters the digital space. It is sleek, dark, and distraction-free. A button pulses: "BEGIN ANALYSIS."

ANNA
(To herself)
Okay. Let's see what you've got.

She clicks. A "TRAFFIC CONTROLLER" scans her credentials. It’s fast. No friction.

INT. THE WIZARD - CONTINUOUS

Anna stands before two massive, glowing doors.

Door #1 is labeled: THE EXPLORER (Vibe First).

Door #2 is labeled: THE ARCHITECT (Structure First).

ANNA

I have a plot. I need structure.

She steps through THE ARCHITECT door.

INT. STORY DNA LAB - CONTINUOUS

A prompt appears: "TELL ME YOUR STORY."

Anna types: "A rom-com where the couple breaks up in the first scene and spends the movie trying to stay apart."

The System hums. It processes.

SYSTEM

Genre: Romantic Comedy.

Logline: Two ex-lovers fight to keep their distance in a small town that wants them together.

Suggested Structure: Save the Cat.

ANNA

(Smirking)

Not bad.

She hits "NEXT."

INT. VISUAL STUDIO - MOMENTS LATER

The System asks for a VIBE. Anna selects "INDIE DRAMEDY."

Instantly, the room fills with concept art. Pastel colors. Quirky fonts. A poster generates on the wall titled: "LOVE IN THE ALGORITHM."

ANNA

Now it feels real.

She selects her ANALYSIS LENS: "MARKET VIABILITY." She wants this script to sell.

INT. THE DASHBOARD - DAY

Anna arrives at her command center. Her project sits at the top of the list.

To her left, the ARCHIVE (The Cutting Room Floor).

To her right, the UPGRADE button (The Studio Deal).

She clicks the blue button: BLUEPRINT.

INT. THE BLUEPRINT ROOM - CONTINUOUS

This is the war room.

On the wall: The Movie Poster she just made.

On the desk: Four headshots of her CAST, generated by the Character Anchor tool.

On the whiteboard: The BEAT SHEET. 15 empty slots waiting for her genius.

ANNA

(Cracking knuckles)

Time to build.

She fills in the beats. The logic holds. She hits the big

button: SCRIPT EDITOR.

INT. THE SCRIPT EDITOR - NIGHT

The blank page is back. But this time, it's not scary. It's formatted.

Anna types. "INT. COFFEE SHOP - DAY."

The software auto-formats it. She types "CHLOE," and it centers it.

She gets stuck. She stares at the cursor.

ANNA

What does she say next?

She clicks the DRAFT ASSIST icon (a small sparkle). A menu drops down.

1. AUTO-DRAFT SCENE

2. SUGGEST DIALOGUE

She clicks SUGGEST DIALOGUE.

Three options appear:

1. DIRECT: "I hate you."

2. SUBTEXT: "Your coffee is getting cold."

3. CONFLICT: "Did you bring the papers?"

Anna picks #2. It inserts perfectly.

ANNA

(Nodding)
Subtext. Always subtext.

She glances at the STORY INSIGHTS sidebar. A red light blinks.

SYSTEM

Logic Warning: Scene 12. The stakes are

too low.

ANNA

Everyone's a critic.

She highlights the text. The System suggests raising the stakes. She rewrites it. The light turns Green.

EXT. HOLLYWOOD - DAY

Anna stands holding a PDF. It contains the Script, the Poster, the Cast List, and the Synopsis.

She hands it to a STUDIO EXEC.

STUDIO EXEC

This... this is a complete package.

ANNA

It's ArcWriter.

FADE OUT.
